Price List 2025

Paddle boats, Row boats, and Motor boats

November 1, 2024 - October 31, 2025

24' Ship-to-Shore boat, USCG approved for 20 passengers

This price list includes examples of the many boats we build. As you may know, **we build to customer specs.**, so if you do not see the boat to fit your requirements, give us a call. The boats we build are utilized in many working environments including:

Row and paddle boats - used by white water tour operators, rescue squads, fire departments, and government agencies (river patrol and survey).

Motorized inflatable boats - used by the geophysical industry, white water tour operators, product harvesters, rescue squads, oil spill recovery units, salvage and diving companies, research and survey groups, and government operations – especially for rough-water patrol and research.

RIBs-sponsons for rigid inflatable boats - used in tour operations, law enforcement, and patrol work. We produce inflatable sponsons for new RIBs and as replacements for existing boats. Most of this work is customized, especially the replacement sponsons.

We fabricate all our boats and related products at our plant in Friendsville, Maryland. Each boat is vulcanized after assembly to produce a durable industrial grade product. See page 4 for information on color availability.

Our terms are one-third down with order, balance due 30 days from shipping date subject to credit approval. All products are shipped F.O.B. Friendsville, Maryland. Boats picked up or delivered within Maryland are subject to a 6% sales tax. Prices subject to change without notice.

Business Hours: Monday-Friday, 8:30 a.m.- 5:00 p.m., Eastern time

* Indicates a self-bailing floor is installed.

Color Availability

We fabricate all of our boats from high-carbon black, military specification neoprene-coated fabrics. To achieve color, we paint the boat prior to vulcanization (the curing process). Also prior to curing, we can apply contrasting colors for top strips, identifying logos, and lettering which we cut out of CSM gum.

We have found this to be a very satisfactory method to benefit from the colorfastness of CSM while maintaining the superior characteristics of military specification neoprene-coated fabrics.

Tube Colors

- white
- yellow
- silver
- light gray
- medium gray
- dark gray
- light blue
- medium blue

Top gum

- red
- white
- black
- yellow
- orange
- light blue
- light gray
- medium gray
- dark gray

*All our products are proudly
Made in the U. S. A.*
